

Project Design Phase-I
Proposed Solution Template

Date	4 October 2022
Team ID	PNT2022TMID31803
Project Name	Early Detection of Chronic Kidney Disease using Machine Learning
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Chronic Kidney Disease (CKD) is a major medical problem and can be cured if treated in the early stages. Usually, people are not aware of it. Consequently, attributes of various medical tests are investigated to distinguish which attributes may contain helpful information about the disease. The information says that it helps us to the problem and it predicts Chronic Kidney Disease it have or not
2.	Idea / Solution description	We have an certain test readings and the analysis of the readings to predict the person to have a disease or not
3.	Novelty / Uniqueness	We have the all main readings and it gives the best analysis to it
4.	Social Impact / Customer Satisfaction	It will surely give the customer satisfying about the result because it have the best result analysis with proper guidelines to cure the disease
5.	Business Model (Revenue Model)	Strengthening Healthcare Infrastructure. * Capacity Building of Human Resources. * Strong - Intersectoral co-ordination
6.	Scalability of the Solution	Strong healthcare solutions Early detection makes us to cure in early stages
